TITLE: POSITIVELY RETAINED CAP FOR USE ON AN ENCAPSULATED ANCHOR OF A POST-TENSION ANCHOR SYSTEM

Supplemental Amendment A: REMARKS

Upon entry of the present supplemental amendment, the specification has been amended to correct a formatting error.

Substitute Page 10 was previously submitted in response to the Notice to File Missing Parts. This page contained portions of Paragraphs [0041] and [0044]. Due to an electronic formatting conversion, three lines were missing from the substitute Page 10 and Page 11. These three lines included the last line of Paragraph [0041], all of Paragraph [0042], and the beginning line of Paragraph [0043]. This subject matter was previously presented in the application.

Applicant has attached a clean copy of the specification, including the three missing lines. Please use this complete specification to be published for the issued patent.

Based upon the foregoing analysis, Applicant contends that independent Claims 21 and 30 are now in proper condition for allowance.

Respectfully submitted,

April 29, 2008
